PROFILE

UI/UX designer specializing in creating user-centered interfaces for web and mobile applications. Skilled in developing wireframes, prototypes, and visual designs to improve usability and meet client needs. Collaborates with development teams to ensure accurate implementation of designs.

PROFESSIONAL EXPERIENCE

February 2025- Present

Wedotech agency Rabat Morocco

UI/UX Designer & Front-End Developer

Led UI/UX design for mobile apps and websites, and front-end development for websites only. Collaborated with clients to understand their needs and deliver intuitive, user-centered solutions. Created wireframes, prototypes, and visual designs, while implementing functional website interfaces. Coordinated with marketing and development teams to align designs with client goals and business objectives.

September 2024 – February 2025

Foundever Rabat Morocco

Technical Support Specialist | John Lewis

Assisted customers by troubleshooting and fixing technical issues related to network systems and software, ensuring effective solutions and high customer satisfaction. Performed system setup and configuration while maintaining clear communication with clients. Provided technical guidance in multilingual environments and supported remote monitoring and documentation to ensure smooth operations.

February 2024 - August 2024

ALTEN DELIVERY CENTER MAROC

Full Stack .Net and Angular Developer

Developed and enhanced features in a consultant management system using .NET Framework and Angular. Collaborated directly with clients in meetings to gather requirements and ensure project alignment. Applied UI/UX design principles to improve user interfaces and overall user experience within the application. Followed Scrum and DevOps methodologies to enhance functionality and system security.

October 2023 - February 2024

JobInTech | International University of Rabat

Full Stack Developer, IT Specialist & UI/UX Contributor

Assisted in server setup and network support, led Scrum Master activities, and collaborated on troubleshooting and development to ensure project success. Contributed to UI/UX design efforts by helping improve user interfaces and enhancing overall user experience across applications.
